CAREER OBJECTIVE

A Computer Science undergraduate with hands-on experience in full-stack development using Spring Boot, React, and the MERN stack. Passionate about solving real-world problems and contributing to impactful projects while continuously enhancing my technical and problem-solving skills in collaborative environments.

PROJECTS

SLinky – URL Shortener | Github

Created a full-stack URL shortener using React (Vite), Tailwind CSS, Express.js, and MongoDB. Allows users to shorten long URLs, copy them easily, and use a fast, modern UI for seamless interaction.

AI-Powered Study Assistant | Github

Built a full-stack web app using Spring Boot, React, and Gemini 2.0 Flash to help students manage notes, generate summaries, flashcards, and practice questions. Includes JWT auth, study scheduling, and a responsive UI with Firebase storage support.

Twitter-Like Social Media Web App | Github

Built a full-stack social media web application with a Spring Boot + MySQL backend and a React frontend. The platform supports user registration, authentication (JWT), post creation, following, liking, and commenting. Followed RESTful design principles with Spring Security and JPA for secure and maintainable APIs.
